EXILE RULER ONCE MORE

Ex-Kaiser Again Sees Pomp

Old Man of Doorn Dons Garb
of Marshal at Climax
of Birthday Fete

Blue-blooded Guests in Gala
Uniforms and Helmets
Salute ex-Emperor

DOORN (Holland) Jan. 27. (P)—The sound of celebrations in honor of former Emperor Wilhelm's seventh birthday which has been going on for the past week was climaxed this morning in an official ceremony of congratulation followed by dinner and services and a dance to grieve over him. If I had

Memories of glorious bygone days were once again conjured up for the aged and asthmatic ruler when he made his appearance, dressed in his uniform, their military rank and spangled helmets, decorations and blue boots saluted the head of the old Hohenzollern family, who was a resident in a field marshal's uniform of the First Royal Guards and wearing upon his broad chest the highest decorations within the gift of the German and many other nations. The women, while wearing their dresses, nevertheless gave a flavor of the old court days by having with them train and executing their court curtsies.

MEAL, COLD DAY

It was a bleak, cold and snowy day on the whole, but the weather seemed moved also to give the ex-emperor a taste of "Hohenzollern weather." It was a noon bright day, but the cold was for an hour and a half. The women, like the black and white colored Hohenzollern flag on the door and entrance building and in gold and black banner of the Emperor's family on the orangeerie, of which had hung limp all day began to shiver and tremble. However, however, there was a time when there was life on the outside to give evidence of it. Dutch constabulary summoned by police from Amerongen sent a constant patrol along the postal lines. Immediately however an automobile became noisy and whirled rapidly past the villages and vainly strung photographers into the premises.

At a few of the uniformed men, however, while in their uniforms, but carried them on their shoulders. Also they mostly wore ordinary overcoats instead of military uniforms. They had their uniforms all the way to the castle where Crown Prince was installed as hostess in the castle of the Ailing Princess Her.

BUSSINES DIPLOMATIC

One version generally current at the time is that the Emperor is only officially still since most of the Hohenzollern clan refuses to recognize her as "Her Imperial Majesty" and the Kaiser's spouse. It also is known that she is out of sympathy with the policies of secrecy on the ban on photographers on occasion as this. All this is

Will Rogers Remarks:

NEW YORK, Jan. 27. (P)—The Editor of the Times: "New York gives its annual reception tomorrow to Capt. Fried of the America. First Officer Manning and his men are just starting on their life-saving careers. They are practically amateurs. But this Fried, it's getting so a boat won't make up its mind to sink till they know he is out on the ocean some place. He takes on more passengers in the middle of the ocean than most ships do at port. If Hoover don't put him on his Cabinet, why Mussolini will on his. An SOS is that bird's telephone number. So via, the whole America crew, and the generous passengers on board. Yours,

WILL ROGERS.

NAVAL BILL LINES LAID

Hoover Reported for Time Limit

Britten Says President-elect
Supports Clause Which
Coolidge Fights

Senate Vote Hoped for This
Week and Defeat Predicted
for Chief Executive

WASHINGTON, Jan. 27. (P)—Herbert Hoover was represented today by Chairman Britton of the House Naval Committee as favorable to retention of the time limitation clause in the naval construction program which President Coolidge is insisting that the Senate eliminate.

On the eve of a vote in the Senate on the battle between the President and naval bill proponents over elimination of this provision requiring a start on the fifteen cruisers within two years, Representative Britton in a statement

had declared: "I am sure the time limit will be pleasing to President-elect Hoover.

"When I talked with Mr. Hoover the other day, he certainly gave me the impression that he was desiring a Navy second to none in power and efficiency; a Navy commensurate with our world commercial and political position."

FIGHT REVIVED

President Coolidge has revived in the Senate the fight which he lost last year in the House to have the proposed naval construction program left to the Senate for the elimination of the time clause.

The House voted to put the construction program into effect before

SKY SLIDE DESCRIBED

Flyer Takes Six Mile Fall

Plane Tester Unconscious
at High Altitude Drops
25,000 Feet

Comes To, Finding Craft
on Fire and Rides
"Chute" to Earth

After becoming insensible through
lack of oxygen and dropping
25,000 feet in an army airplane,
Lieut. Julian B. Haddon regained
consciousness in time to discover his
machine in flames. In the following
narrative he relates his thrilling ex-
perience and graphically describes his
escape from death.

Lieut. Haddon is attached to the
Army Air Corps at Wright Field, Dayton, O., where various types of
army airplanes are being tested.

BY JULIAN B. HADDON

First Lieutenant, Air Corps, U.S.A.
(Copyright, 1929, by the National American
Newspaper Alliance)

DAYTON (O.) Jan. 27. (Exclusive)—Yesterday at 9:30 a.m. I
took off from Wright Field, Dayton, O., in an experimental single-
seated army pursuit airplane, equipped with a D-12 430-horse-
power motor, with side type ex-
haust driven supercharger.

I was one of the regular
schedules to fly flights which are
conducted on various types of airplanes
and equipment by the United States
Army Air Corps at Wright Field.

The purpose of this particular
flight was to determine the best
climbing rate and the maximum
rate of descent of this airplane
when equipped with a super-
charger. The supercharger is an
apparatus for preventing decreased
power of the motor due to the rare-
ness of the atmosphere at higher
altitudes.

PERMITS HIGH FLYING

In an airplane of this type the use
of the supercharger has been
introduced. The airplane will
fly from about 21,000 feet to approximately 35,000 feet.

It has been found from exper-
iments made by the Army Medical
Corps, and from actual flight tests,
that at altitudes above 15,000 feet
the atmosphere becomes so thin that there is insufficient
oxygen available for the average
person to function normally. At
the extremely high altitude which
was attained, the oxygen available
for flight is, of course, necessary
to get the airplane up to the
level to carry a supply of oxygen.

This oxygen is inhaled through
the mouth by means of a small
tube with a rubber nipple, a valve
being installed in the tube to reg-
ulate the flow.

The extremely cold temperatures
found at the higher altitudes makes
very bulky clothing necessary. The
coldest temperature I found on this
flight was 50 degrees below zero cen-
tigrade. I wore a heavy plane-
flying suit, mosquito-furred,
and, of course, goggles and face mask,
and the standard army parachute.

I am sure the time limit will be
pleasing to President-elect Hoover.

When I talked with Mr. Hoover
the other day, he certainly gave
me the impression that he was
desiring a Navy second to none in
power and efficiency; a Navy commensurate
with our world commercial and
political position."

America Heroes Speak on
National Chain, Telling of
Thrilling Rescue

NEW YORK, Jan. 27. (P)—The
heroes of the America tonight told
a nation-wide radio audience in a
matter of fact way of their thrill-
ing experiences in rescuing the
crew of the disabled Italian
freighter *Yankee* off the Virginia
coast last Wednesday night.

Capt. George Fried, Chief Officer
Harrington, Chief Radio Operator
Nelson H. Smith and Salvatore
Bracco, bow carman of the Ameri-
can lifeboat crew, spoke from the
studio of WABC here over the Co-
operative Broadcasters' chain.

Brig.-Gen. A. C. Dalton, general
superintendent of the Merchant
Fleet Corporation, introduced the
men in an address lauding their
courage.

Capt. Fried traced the progress of
the rescue attempt along the lines
he did in his dispatch to the Asso-
ciated Press the day after the
rescue, elaborating, however, on his
own feelings and the reactions of the
men who risked their lives on the
errand of mercy. "But if any re-
quest is given to me to tell the men
what they did go to the Devil," he
said. "I am in charge of one of the most
gallant young officers. I have ever
met—Harry Manning."

QUINTET ENTERS JUNGLE IN HUNT FOR FAWCETT

Intuition, Skill and Tact Prove Prime Essentials as Dyott Party Pushes On

[In the second article of his series telling the story of the quest for the lost explorer Col. Fawcett, Commander G. M. Dyott tells of the start across the Matto Grosso of Brazil toward the jungle that swallowed up the missing British explorer.]

BY G. M. DYOTT

(Copyright, 1929, by North American Newspaper Alliance) NEW YORK, Jan. 27. (Exclusive)—None of my companions had previous experience in the field of exploration. Their knowledge lay in other directions. William De Mello and Gerard Martin were the radio experts. J. J. Whitehead and Sam Martin made

that we should find ourselves in country utterly unknown to white men or that we might end in some remote village in the interior. There was an uncertainty about our movements which complicated the situation considerably. At the same time I must admit it made our task infinitely more interesting.

All reports of Col. Fawcett's movements after passing beyond the point of civilization proved entirely false. He never reached the River of Death as reported by certain imaginative writers. Neither did he strike north of the Parahatinga as many supposed. Stories circulated that he had been living on a farm in the jungle, the skill of a big-game hunter to track our quarry: the tact of an ambassador to deal with awkward situations, and a certain amount of that same hardiness which Fawcett himself possessed to carry us through such difficulties as would meet our path.

ORGANIZED FOR HUNT It should be pointed out that our expedition was not organized to explore Brazil, but to hunt for Fawcett wherever he might be. Whether the trail would lead us we knew not and cared less. It was possible

Splendid Opportunities Open for Men of Character Who Want to Build for their Future

J. ROY KRUSE, President

Home Office Sacramento, California
Los Angeles Branch 641 Citizens National Bank Building, Los Angeles

Last Outpost of Civilization

[Copyright, 1929, by North American Newspaper Alliance.]

The radio station at Balkari post, the last outpost of civilization. William De Mello, the Dyott Expedition operator, at the radio set, and Jerry Martin, his assistant, standing by.

STARTING POINT

This was to be our starting point. We got there, had a story in it which we had not been detailed here. There were unexpected developments which necessitated a long stay in Rio but the help which the Brazilian government extended facilitated our movement later and resulted in our safe return to文明.

Innumerable efforts were made to prevent our going. Received letters telling me that my life was in danger and that the entire expedition would be wiped out. In spite of all warnings we made a start, and on May 8 we found ourselves at Balkari.

The hand of civilization spreads lightly over the State of Matto Grosso. At the extreme tip of one tapering finger a group of shacks can be found clustering dejectedly about a flag pole. This is Balkari Post, or, as it is generally called, the base from which the government hopes to develop the unknown lands which stretch away for countless miles toward the Amazon. It took Fawcett's whole month to get here from Cuiaba, the State capital. We made it in a day, having cut across country and traveled in a motor truck part of the distance.

DELAYS BEAR FRUIT

Those long delays in Rio now began to bear fruit. The government had sent word ahead of our coming. Consequently we found an army of men at the post on the banks of the Sao Manoel River ready to transport us to Balkari and beyond. It would have been impossible for us to have collected animals in such numbers on short notice. For several weeks they had been assembling, apparently to government appeal. But two and three times they had come from outlying districts. Some had covered ninety to 100 miles, traveling in easy stages of fifteen to twenty miles a day.

Without any loss of time we packed up the post and spent a couple of days there, arranging a course. Bill De Mello and Jerry Martin were very successful in their early radio experiments. They established frequent contacts with the U.S.A. telling our friends of the

satisfactory progress we were making. On June 11 we were ready to move and what a sight it was. No such expedition had ever ventured into these parts before. There were sixty-four bullocks carrying loads varying in weight from eighty to one hundred and twenty-five pounds each, heavily laden and twenty-six men, to say nothing of a host of insects that had attacked us since we had started.

We had in all well on to three tons of baggage to lug about, every ounce of which was essential if we were to carry out our ambitious program.

(In his next article Commander Dyott describes the treacherous Indians and the trek across their territory.)

Victim of 'Ride' Identifies Two as Assailants

SAN FRANCISCO, Jan. 27. (P)—Eastern gang war methods were introduced into San Francisco again early today when three men took Frank Ramirez, 24 years of age, "for a ride," shot him twice, and left him lying in the street in the Latin quarter.

Ramirez, in a hospital with bullet wounds in his shoulder and abdomen, identified James Cascino, one of his neighbors, as the gunman who fired the shots, and Robert Murphy, also of San Francisco, as the driver of the automobile.

Cascino, Murphy and Joe Spinosa were charged with assault to commit murder.

Policemen believed the shooting either was the outcome of a liquor war or was caused by the victim's jealousy regarding his young wife.

Ramirez refused to indulge in surmises as to the cause of the attack.

PLenty of FOOD

The bulk of our cargo consisted of food and plenty of it. We cannot enter this country without it. Game is not to be depended upon and such as one kill can only be regarded as so much trash.

On this occasion we did not have to fall back upon the pack animals to replenish our larder because we carried a special stock of dried meat with us weighing 600 pounds.

Police believed the shooting either was the outcome of a liquor war or was caused by the victim's jealousy regarding his young wife.

Ramirez refused to indulge in surmises as to the cause of the attack.

ZERO'S SCEPTER OVER MIDWEST

(Continued from First Page)

were stalled throughout the country, but no deaths were reported.

SPRING IN COLORADO TEMPTS MOTORISTS

DENVER, Jan. 27. (P)—Spring is now revealing in the rugged part of Colorado the snow. Rising temperatures prompted hundreds of Denver motorists to drive to the mountains where heavy snows mantle the Rocky Mountain range. A ski tournament on Genesee Peak, twenty-five miles from Denver, drew thousands.

An Idaho report stated that Burley was isolated, due to the heavy snowstorm that has been raging in the southwestern part of the State for several days. Efforts to open roads to traps were considered out of the question at present.

"The House," said Mr. Britten, "is overwhelmingly in favor of building real steel ships quickly and the same year the limit will do it."

Another Arctic blast from the north chilled Montana last night, enveloping most of that State in blizzard-like weather and hurling the mercury to subzero levels. The worst storm in 15 years was reported in the vicinity of Missoula, west of the Continental Divide, where temperatures normally are higher than on the eastern slope of the range. At Lewiston, Mont., the mercury dropped to 18 below zero last night.

PARIS EXPERIENCING BITTER WINTER COLD

PARIS, Jan. 27. (P)—Five persons have died in Paris and its suburbs because of the extreme cold, while 3,000,000 others are shivering in the most severe weather experienced in France since the Seine froze over in the "calamity year" of 1870.

The injuries through falling on packed snowdrifts with ice and frozen snow numbers several hundred, many of whom are in hospitals for treatment of broken legs and arms. Even the so-called sunny Riviera has been disturbed by the elements. The sea port of Marseille is virtually inaccessible.

Parisians are keeping the Belle Isle in winter, as keeping the small boat Ragnartana from India from docking. It is anchored off the Island of Chateau D'If.

PARIS WELCOMES NAVAL CONFERENCE

LONDON, Jan. 27. (P)—Commenting on Washington indications to the effect that President Hoover plans to summon a conference of the leading naval powers to discuss maritime law with special reference to the rights of neutrals, the London Daily Telegraph's diplomatic correspondent declares that such a practical question is bound to arise without waiting for a settlement of naval parity and disarmament that it will dominate the vital question of naval disarmament.

Although he points out its complexity he suggests that Great Britain will welcome the discussion but is bound to await the general election in accepting the invitation, just as the United States feels obliged to await the British inauguration.

COOLIDGE FUND NEARING GOAL*Million and Half Donated for Deaf School**Massachusetts Institution Needs \$2,000,000**Many Notes on List of Contributors to Project*

WASHINGTON, Jan. 27. (Exclusive)—The Coolidge fund for the Clarke School for the Deaf in Northampton, Mass., has reached \$1,500,000 of the \$2,000,000 sought, according to Earle P. Charlton, of Falls Church, Va., general chairman of the fund, in a statement issued today through headquarters here.

"Of the \$1,500,000 now given or pledged, \$250,000 is in contingent gifts," stated Mr. Charlton. "Fifty thousand dollars have been given raising the full amount by March 4, next. To claim these gifts is an additional spur to prompt giving by those who wish to share in making this fund a success."

Recent donors to the Coolidge fund are: Dwight W. Morrow, Mrs. Mrs. and Mrs. Frank W. Stearns, William D. Thornton, the late J. Horace Harding, \$10,000—and a second gift of \$5000 from Mr. and Mrs. Louis K. Liggett, which brings their total contribution to \$10,000; Cornelius N. Blits, Mr. and Mrs. N. L. Blits; Elvira S. Du Plessis, Mrs. William L. Harkness, Adolph Lewisohn, Mrs. William H. Moore, J. P. Morgan, Walter Scott, Mrs. Nathaniel Thayer, Mr. and Mrs. Frederick Weyerhaeuser, R. M. Wey-

CHEESE IT! PLEADS MERCHANT*Dairy Dealer of San Jose Denies Dabbling in Contraband; Doubting Devotees of Dry Laws Informed Dark Deliveries Legitimate*

SAN JOSE, Jan. 27. (AP)—When it happened the fifth time Joseph Toesca, law-abiding San Jose cheese merchant, felt something ought to be done about it, so he appealed to local newspaper to print the following letter:

"To whom it may concern: For the benefit of the unknown party who has five times informed the Sheriff's office that liquor is being hauled to my place, I shall

J. Storrow, Hon. William Howard Taft and Eugene V. R. Thayer.

CANDY MEN AT DEL MONTE

DEL MONTE, Jan. 27. (AP)—Confederates from every Western State arrived from the Del Monte today to attend the annual convention of western confectioners, which opens here tomorrow and concludes on the 31st inst.

RIVER HARNESS MILLIONS SPENT*Mississippi Control Work Being Speeded Up*

WASHINGTON, Jan. 27. (Exclusive)—The work of levee building and bank revetment on the Mississippi flood-control project is progressing at a rate to complete during this fiscal year the expenditure of the \$24,000,000 appropriated for that purpose. The prompt action by the flood-control board last summer has made possible the rapid execution of levee building. This board was able to reach its conclusions promptly because it had before it all the data that had been prepared by the board on reservoir possibilities, as well as by the Mississippi River Commission during the forty-eight years of existence.

Surveys by the Mississippi River Commission and by local interests for drainage and reclamation purposes covered practically every foot of the alluvial valley.

The flood-control board had before it facts and figures on reservoir possibilities on the Arkansas and White rivers, which prove conclusively that flood waters must be taken care of by flood-walls since the Mississippi Valley itself since adequate protection could not be afforded by reservoirs at any permissible cost. The proposed reservoirs on the Arkansas and White rivers would require more valuable lands than those the advanced floodways, and in addition would not retain sufficient water to avoid the necessity for floodways if adequate protection is to be obtained.

American Kills Self in French Swindle Sequel*House Tariff Committee to Quiz Agriculturists*

NICE (France) Jan. 27. (AP)—The suicide yesterday of Joseph Jules Marz, a former resident of Chicago, marked the first American victim of the Gazette de France swindle which involved losses of millions of dollars. Five Frenchmen now have died by their own hands because of losses in this case. Marz shot himself while seated in an automobile parked in a public square.

On his body the police found a receipt signed "Madame Hanau" for the amount of 250,000 francs (about \$10,000) for "value received." The police believe that Mrs. Hanau was the husband of the private secretary of Mme. Marthe Hanau, who was of the Ghetto. Hanau invested his private fortune in an attempt to save his wife when the collapse came.

DEPOSED IRAK CHIEF

MISSIONARY'S SLAYER

BASRA (Irak) Jan. 27. (AP)—It has been learned that the leader of the Bedouin tribesmen who killed Rev. Henry A. Biltz, an American missionary, last Monday, was Ibn Kathir. He recently was deposed from the chieftaincy of the tribe by Ibn Saud, ruler of Irak.

The present chief of the tribe, with the title "Khalif" (sheik), is

blameless for the ambush of the American party.

FARM PRODUCT HEARING TODAY*Australia Party Leaves Bay City for Los Angeles**Rumors Rife Concern Johnston's Scrivener*

SAN FRANCISCO, Jan. 27. (Exclusive)—Regretful good-bys to San Franciscans were said tonight by the 160 young Australians, members of the Young Australia League's educational touring party which began its four months' sojourn in America yesterday. The boys left at 8:45 o'clock by train for Los Angeles on the tour which will take them through the larger cities of the South and East and Canada.

The Australian lad will be in Washington for the inauguration of President-elect Hoover, later will spend some time in Philadelphia, New York and Boston, and will visit a number of leading American universities, including Harvard and Yale. They are to sail from Vancouver on their homeward voyage in June.

KONIGSBERG KEEPS ITS HARBOR OPEN

KONIGSBERG, Jan. 27. (Exclusive)—Winter has not put a stop to navigation in the harbor.

The Baltic does not freeze over at Pillau, outside the entrance to the harbor proper, but merely to the outer canals leading to the city.

Shipping lines, cotton manufacturers will hold the attention of the committee from Tuesday to Friday.

MRS. HAMMOND STORY AWAY*Slash in Appropriation Precipitate Clash**Five-Year Program Men by Proposed Cut**New Supply Bill Leaves Corps Short*

OKLAHOMA CITY (Okl.)—With Henry G. Johnson suspended from the Committee on Appropriations, now before a Senate investigating committee, Oklahoma legislation to be introduced in the House to-day will be the future may have to be thumbed over the map to see the "most hectic week" of tariff revision.

Prominent in the most active revelations from a Senate appearance before a western committee of the Young Australia League's educational touring party which began its four months' sojourn in America yesterday. The boys left at 8:45 o'clock by train for Los Angeles on the tour which will take them through the larger cities of the South and East and Canada.

The War Department appropriations bill for the coming year, was introduced in the Senate next week by a group of Senators headed by Hiram Bingham, former war-time commander of the 10th Cavalry, and now president of the National Geographical Association.

THERE'S A BETTER SHOW AT LOEW'S STATE

AT BROADWAY AND SEVENTH
...you will find a combination of screen, stage and music unexcelled...unrivalled...not only in California...not only "West of Chicago"...but the best...the most generous...program in the entire country. A program backed by West Coast Theatres...today the leading theatre operating company in America...by Metro-Goldwyn-Mayer...by William Fox Productions...by the Loew interests. There can be no better entertainment...anywhere...than that offered by such companies.

**WILLIAM HAINES
'ALIAS JIMMY
Valentine'**

A FAVORITE AMERICAN STORY... a story of adventure, romance, human interest...with "Alias Jimmy Valentine" Metro-Goldwyn-Mayer present their first talking picture. Not an experiment...but a talking picture acclaimed by bialle Broadway where...for weeks...it has been packing the Astor Theatre at a \$2.00 scale of admission. There is a perfect cast in "Alias Jimmy Valentine"...Lionel Barrymore, Leila Hyams, Karl Dane, Tully Marshall...the direction by Jack Conway.

THE Fanchon and Marco "Ideas." Our slogan with our stage entertainment should read... "Made in California"...for they are just that. The beauty of California...the delightful Sunkist Beauties are now internationally famous. The brilliance of the stage productions...all of them bright and clean...built right here in Los Angeles. The talent is nationally famous...because every artist in every branch of stage endeavor, is attracted by a "season in California." West Coast Theatres originated this type of stage presentation in motion picture theatres...they will continue to lead where all others may only hope to follow.

Future Generals Get Early Starts—This photo shows the "Three Mosquiteers" of the Army and Navy Academy at San Diego as they appeared at recent review before Brig.-Gen. Fred S. Strong. They are, left to right, Ray Jones, 6; Joe Jones, 8, and William Sparks, 7. (P. & A. photo.)

HIGH LIGHTS IN HISTORY 1249

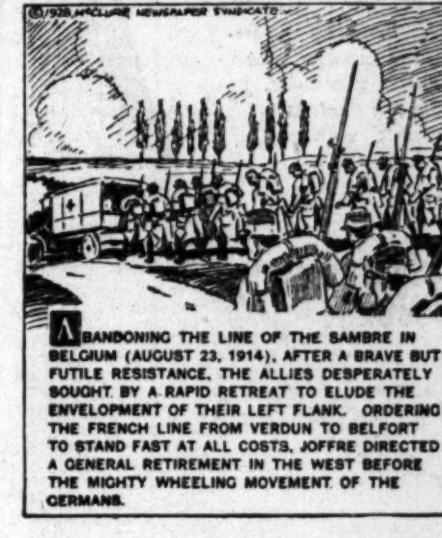

After the early delays in Belgium, the German advance proceeded with clock-like precision. From Brussels Gen. von Kluck, with the 1st Army on the German right, began a sweeping flank movement that can best be described as a football term, an "end run," around the left wing of the allied armies, with Paris as his goal.

The Germans planned to push back the allies' left, which pivoted upon the fortress of Verdun, and force it to swing south and then east, away from Paris, and back upon the center and right of the French line—a movement comparable to that of closing the blade of a pocket knife.

The Story of the World War XIX—Von Kluck's Wheeling Movement.

by J. CARROLL MANSFIELD

ABANDONING THE LINE OF THE Sambre in Belgium (August 23, 1914), after a brave but futile resistance, the allies desperately sought by a rapid retreat to elude the envelopment of their left flank, ordering the French line from Verdun to Belfort to stand fast at all costs, Joffre directed a general retirement in the west before the mighty wheeling movement of the Germans.

THE GERMAN PURSUIT WAS WORSE THAN LENTLESS. THEIR HEAVY GUNS HAD TO EXPLODE AND SHRAPNEL. AFTER THE RETREATING FRENCH AND BRITISH ARMIES, WHILE THE CAVALRY OCCUPIED TOWN AFTER TOWN IN AS THEY WERE ABANDONED. IN SPITE OF THE NEED OF HASTE, THE RETREAT OF THE ALLIES WAS CONDUCTED IN AN ORDERLY MANNER. THE LINE SWUNG BACK UNBREAKABLE.

EDINBURGH (Scotland) Jan. 27.—The Scottish Nationalist has thrust itself to the front as a leading issue in the Midlothian by-election or last. The famous Gladstone campaign in this con-

stituted the first time home rule was offered to the voters of Scotland and all parties are watching with unusual interest.

There are four candidates: Major Liberal; Conservative; David Lloyd; Andrew Clarke, Labour and Lewis Spence. Spence's platform is self-government for Scotland or, to use his phrase, "an independent

Health is in danger when gums break down

As many men and women ignore the fact sooner or later they may pay the price of neglect. They brush their teeth faithfully and feel secure. Yet, health, youth and beauty slip away. And here's the reason: teeth are only as healthy as the gums. Gums must be brushed daily, morning and night, if they are to resist such dread diseases as Pyorrhea, Gingivitis, Trench mouth. When once contracted only dental treatment can stem the advance of these diseases.

Forhan's for the gums

As a measure of protection, brush your gums vigorously with the dentifrice designed to help keep them firm and sound . . . Forhan's for the Gums.

When you have used Forhan's for a few days, you'll notice a distinct improvement in the way your gums look and feel. In addition, the way this dentifrice cleans teeth and helps to protect them from decay will delight you. Start using Forhan's today. And see your dentist every six months.

HITCHCOCK STARS AS SAN CARLOS RIDERS WIN

CALIFORNIA IN SPECIAL MATCH

Austin Clapp Crash Victim

STANFORD UNIVERSITY, Jan. 27.—Austin Clapp, Stanford freshman swimming team captain and member of the 1928 American Olympic team, suffered a broken and sprained right wrist yesterday. He fell from the running board of an automobile as it rounded a corner near the campus postoffice, and he tumbled over and over in a number of athletic somersaults. The pavement, however, was more unfriendly to him than his native element, water, and he came out the loser in the contest. The injury is not expected to keep Clapp out of Encina pool for the freshman swimming meets, which commence soon.

CALIFORNIA GOLF TEAM VICTORIOUS

Oregon Squad Smothered
in Interstate Matches by
Score of 7 1-2 to 1 1-2

DEL MONTE, Jan. 27. (P)—California overwhelmed Oregon in the annual interstate team matches which ended at Pebble Beach today.

Oregon entered the competition as the favorite, and no one expected California to win by such a large score. A year ago Oregon won by one point, and last June, at Lake Oswego Country Club, near Portland, the matches ended all square.

Most of California's representatives were going very nicely at Pebble Beach, and one of them, the brilliant and phenomenal scores.

The onslaught of eagles, birdies and pars was too much for the Oregonians.

Fay Coleman, Johnny McHugh, Don Moen and Chan Egan were today's outstanding stars.

John J. McHugh, California, defeated Dr. O. F. Willing, Oregon, 6 and 5.

Fay Coleman, California, defeated Frank Dolph, Oregon, 9 and 7.

Charles Seaver, California,

(Continued on page 12, column 7)

STYLING MAN OF THE HOUR

(P) Jan. 27. (P)—Styling, fresh from his victory, came home a brief period of adult life to his home folks who saw him a gawky boy before he settled down to serious training for the Sharkeys, go which will be the most important in his life, since he clinched with Paul Beerbach in New York several years ago. Stirling and his entourage will leave here Tuesday for Miami Beach, and plans to pitch his training camp there February 1.

Stirling said today he was in excellent condition and ready to settle down to serious training for the Sharkeys, go which will be the most important in his life, since he clinched with Paul Beerbach in New York several years ago. Stirling and his entourage will leave here Tuesday for Miami Beach, and plans to pitch his training camp there February 1.

Stirling, holding over with

his knockout of New Orleans, found pictures of his training pose in every room and a gilded hand.

OIL and MINING

TIDELAND WORK MAY BE PUSHED

General Petroleum's Right to Drill Unquestioned

Lease Negotiated Year Ago and Well Begun

Demand for Pier Permit Up to War Department

While no information concerning the plan has been given out it appears probable that the General Petroleum Corporation intends to proceed with the drilling of at least two wells on tidelands at Seal-Cliff, piling and concrete bases for a couple of derricks to stand at mean high tide having been put in just about a year ago when the tide-land drilling proposition was thrown into the State Supreme Court by suits to test the State Leasing Act.

The act was upheld recently by the court, but since then the Legislature has shoved through an emergency bill providing that no leasing can be done below mean high tide. However, it is believed that General Petroleum Corporation can go ahead with at least two wells because its permits are regarded as being regular and the projects were started before the emergency act was thrown in.

The company has applied to the War Department for permission to construct a pier 1400 feet long from mean high tide at Punta Gorda, just west of Seal-Cliff. While the Seal-Cliff field has been considerable in the development of the tidelands, the ocean have produced the best results and General's two projects which have been standing idle a year, are farthest northwest—the direction in which the main pool of oil is thought to lie.

In addition to these projects others must be undertaken in on the same permit and the company has holdings a few hundred yards farther to the northwest at Muscle Rock, where an exploratory well now is being drilled jointly by several companies.

It would not be impossible for the company to develop sufficient production in that vicinity to justify the construction of the proposed pier.

DOYLE RESIGNS

Midway Gas Superintendent to Join Pacific Company

TAFT, Jan. 27. (Exclusive)—Fred D. Doyle, well known in Taft, has resigned as superintendent for the Midway Gas Company on the west side of San Joaquin Valley, to accept a post with the Pacific Gas and Electric Corporation, as superintendent of its gas division.

The company which Mr. Doyle has joined will in a short time begin construction of a 250-mile pipe line from Buttonwillow Ridge to San Francisco.

MINES AND OIL DROPS NAME

Organization Formed in 1907 Adopts Title of California Oil and Gas Association

After functioning for eighteen years under its present name, and for the first three years of its existence under the banner of the Chamber of Mines, the Chamber of Mines and Oil of Los Angeles is going to change its name. In the near future it will become known as the California Oil and Gas Association.

This decision was reached by the chamber's directors at their last meeting, the vote being unanimously in favor of the change. A committee now has the matter in charge, and will take the steps necessary to bring about the change as soon as possible.

In announcing the new plan, the chamber's department of public information points out that for the past eight or ten years the oil and gas business has forced its way to the front in leaps and bounds, while mining, because of market depression and unfavorable production conditions in most districts, has become of lesser importance in the chamber's scope of activities.

On the other hand, chamber officials say, the oil and gas business is to come to a large factor in the chamber's work and for upward of a year and a half has been claiming a great deal of its attention. In addition to a complete file of data regarding oil and gas, the chamber has in its library and information center a collection of natural gas and oil literature which is unique in the mining industry. This will continue to be available, and the needs of those mining members who still remain in the organization will be given careful attention as in the past.

The Chamber of Mines was organized in Los Angeles in 1907 to foster the advancement of oil and gas in the west. Three years later, because of the rapid development which the oil industry was enjoying in this State, it was decided that the name of the organization should be changed to include petroleum, so thereafter it became known as the Chamber of Mines and Oil.

At present, the chamber represents all of the large operating companies in the oil industry of California, and practically all of the small ones. It also is representative of the gas industry, which has made astounding growth in the last few years.

The bureau of mineral information points out that in the last five years the chamber has brought about whole-hearted co-operation within the industry and has gained and held the confidence of the public as well as of officials of the State and national governments.

Plans are being made according to Managing Director Higgins, for the annual banquet of the Chamber of Mines and Oil to be held March 7 at the Biltmore Hotel. The program has not been completed, but it has been announced that efforts are being made to obtain an oil man of national prominence as chief speaker for that occasion.

The Honolulu Consolidated Oil Company has begun drilling its No. 55 well on Sec. 8, 33-24 in the Midway field.

The Cymric Oil Company has spudded in its No. 6 hole on Sec. 26, 29-21 in the McKittrick district.

The Petroleum Securities Company has a well on the San Joaquin 9 well on the Gidley lease in the Poco Creek field, on Sec. 21, 27-22.

Three shut-off tests for water shut-off were reported during the week, five of which are in the Midway field, the latest being on Sec. 22-23 and 28, 31-34, respectively.

North American Oil Consolidated No. 32, Sec. 32, 31-24; Chancellor-Canfield Midway Oil Company No. 3, Sec. 1, 32-23; Republic Petroleum Company No. 33, Sec. 7-22.

Three shut-off tests were reported from the Belridge field, the wells being Union Oil Company No. 6 and No. 7 on Sec. 30, 28-21 and the Ohio Oil Company No. 23 on the same section.

The General Petroleum Company has been successful in getting a water shut-off in its No. 11 well on Sec. 18, 27-28 in the Poco Creek field, at 1500 feet. The hole is down 1572 feet where the drill pipe was run. The crew is now running three-inch tubing.

Gillard and Phillips are held up temporarily in their No. 1 well on Sec. 23, 27-28 in the Poco Creek field, while waiting for casting. The hole is down 790 feet in shale.

Beginning regular shipments on the 17th inst., the Comanche and R. Company of this city consigned twenty-one tons of silver lead and copper ore from its Mono county mine, valued at \$115 per ton, to a smelter at Midvale, Utah, similar to the one which operated for the last of this month, and it is planned to ship two carloads monthly as the mine is opened up for future production.

In the development of the Comanche, according to Charles A. Palmer, president and general manager, necessary lead work has been performed, and from now on all drifting and raising will be in the hands of commercial value.

At the present time, he says, the ore bodies from the 800 to the 1000-foot levels are being blocked on four sides to determine the tonnage and the nature and quality of the mineral products in each section. The plan for the proposed milling plant for the treatment of the lower grade of mine ore. Plans for the mill are well under way. Annual stockholders' meeting will be held February 8.

General Makes Water Shut-off at Poco Creek

POCO CREEK, Jan. 27. (Exclusive)—The General Petroleum Company has been successful in getting a water shut-off in its No. 11 well on Sec. 18, 27-28 in the Poco Creek field, at 1500 feet. The hole is down 1572 feet where the drill pipe was run. The crew is now running three-inch tubing.

OIL SHIPMENTS AT HIGH FIGURE

Port During January to Pass 10,000,000-Barrel Mark

Total for Last Week Placed at 2,226,114 Barrels

Fuel Holds Lead With Crude Taking Second Place

Shipments of bulk petroleum products from Los Angeles Harbor during the first twenty-eight days of the month totaled 9,495,397 barrels, giving the first month of the year well more than 10,000,000 barrels of oil shipments from this port.

Last week the total was 2,226,114 barrels, fuel oil being in the lead with 684,757 barrels, crude being second with 659,574 barrels, gasoline being third with 537,621 barrels, and oil stances in fourth place with a total of 285,150 barrels.

The Pacific domestic trade took 1,192,984 barrels, embracing 617,343 barrels of crude, 380,448 barrels of fuel and 185,290 barrels of gasoline.

Shipments of crude for the Pacific foreign trade took 158,232 barrels, gasoline 151,800 barrels of gasoline, kerosene 95,000 barrels and 42,229 barrels of lubricating oil, and 3668 barrels of batching oil.

COTTON ON BELT
MARKET STRONG

Shippers Active in Covering Future Contracts

Factors Advising Clients to Hold Until March

Volume of Turnover in Spot Comparatively Small

MEMPHIS (Tenn.) Jan. 26. (Exclusive)—Efforts of shippers to cover forward orders for delivery in February, March and April gave the Memphis spot-cotton market more stimulus the past week, while on the surface, actual turnover of local spot cotton proved comparatively small.

Sales between shippers do not show in the weekly turnover of sales as reported officially, but it is no secret that many shippers, failing to obtain what they need in the regular market, are forced to obtain cotton from their brethren-in-arms and at advanced prices.

The Alta Mining Company reports that a six-foot ledge of milling ore has been opened in the shaft, approximately twenty feet from surface. A substantial tonnage of probably ore has been exposed underground and stored in old dumps, and the building of ten-stamp mill is proceeding. The property was recently reopened after lying dormant for years.

Monarch Gold mine near Sierra City, for several years a noted gold producer, has been acquired by the Monarch Alconda Mining Company. The new owners say that the old producer will be reconditioned, new equipment installed and efforts made to keep mine on a steady production basis.

It is reliably reported that one of the biggest spot houses here is to be closed, probably in the next few weeks, and is shopping the market for supplies. The supply of whiter grades is becoming more scarce, and buyers are turning more eagerly to the lower grades, only to find them in rather strong hands and a growing inclination to hold for advanced prices.

HOLDING URGED

Factors are urging their clients to hold tenaciously to their cotton until March and May covering before the market is becoming a much stronger demand and willingness to pay greater premiums.

F.B.I. cotton men continue to report good business, with more activity than recently in the longer staples that have been more or less dormant this season.

One firm sold 100 bales of 56-58 cotton, and another 100 bales of 55-57 cotton.

There is little speculative interest in Memphis with the passing of January.

SALES LIGHT

Total sales this week here were 18,200 bales, including only 700 bales of spot cotton actually reported by buyers and factors. Total receipts at Memphis for the week were 55,000 bales, 15,000 of which were locally produced, which compares with 31,900 and 8900 this time last year and 55,000 and 15,000 the year before.

Total shipments ran ahead of the receipts by some 6000 bales and total stocks on hand were reduced by this amount to 268,000 bales, which is 38,000 bales less than were in stock here this time last season.

Weather conditions have been ideal for preparing the soil for the coming crop. Abnormally wet and warm weather, with temperatures as high as 65 deg., has been followed by cold weather with temperatures ranging from 2 to 15 deg. minimum, these conditions alternating three or four times already this winter. If we survival means anything, it will be a rather bullish condition, as we weather, followed by freezing, was formerly supposed to greatly deplete the ranks of the hibernating insects.

CROP OUTLOOK

With regard to the size of the coming crop, if winter influences count, it may be said that economic condition of the farmers is fair to good, and so far there has been nothing said as to concerted effort to reduce the acreage. All things considered, it is usually believed that the southern farmer will plant every foot of ground in cotton. Good credit and a fair supply of good seed, will aid in keeping the acreage large.

However, the chief worry will be labor. Planters everywhere in the central hills are experiencing labor in order to keep them from deserting to join the gangs being formed by government engineers in the big river-control project. Upward of 10,000 persons, largely negro farm hands, will be utilized in this project and until the planting season is well under way, little, if any, labor will be available.

Stock Exchange
is Authorized

SAN FRANCISCO, Jan. 27. (Exclusive)—The Transamerica Corporation has been authorized by the State Corporation Department to issue 1,500,000 shares of its stock to stockholders in the Bank of America N. A. in exchange for shares in that bank issued and outstanding. The ratio of exchange will be one and one-half shares of Transamerica for each share of Bank of America N. A.

Transamerica Corporation is also authorized to sell the unissued portion at \$125 per share.

OPTIMISTIC ON OIL

Analysis of Situation Made by Brokerage Concern

Although new oil fields will be constantly developed in the United States, there is at present a sufficient curtailment of development and prospecting that present even increasing consumption will overtake the rapidly declining production in the near future, according to a report of the oil industry entitled "Black Gold," just published by Toole-Tietzen & Co., members of the Los Angeles Stock and Curb exchanges. With this condition it is inevitable that the industry as a whole will improve, the experts stated.

"With new fields in sight," the booklet states, "we can easily picture a prosperous period ahead for California oil. Regardless of how much new oil might be discovered in the Midcontinent or foreign fields, the production of oil imports to meet Pacific Coast needs the transportation cost on oil is such that California prices can be increased considerably before a balance would be reached."

OLDSMOBILE OUTPUT
SHOWS BIG INCREASE

NEW YORK, Jan. 27. (Exclusive)—Production of the 1929 Oldsmobile is being increased rapidly and equipment at the Oldsmobile factory is now practically at the peak reached during the spring and early summer months of last year when new high production records were made, officials announced today. The production schedule for this month will be several times greater than that of January, 1928.

Annual sales made at the New York Automobile Show were reported to be large and most satisfactory.

Good Ledge of Milling Ore Opened by Alta

SACRAMENTO, Jan. 27. (Exclusive)—Efforts of shippers to cover forward orders for delivery in February, March and April gave the Memphis spot-cotton market more stimulus the past week, while on the surface, actual turnover of local spot cotton proved comparatively small.

Sales between shippers do not show in the weekly turnover of sales as reported officially, but it is no secret that many shippers, failing to obtain what they need in the regular market, are forced to obtain cotton from their brethren-in-arms and at advanced prices.

The Alta Mining Company reports that a six-foot ledge of milling ore has been opened in the shaft, approximately twenty feet from surface. A substantial tonnage of probably ore has been exposed underground and stored in old dumps, and the building of ten-stamp mill is proceeding. The property was recently reopened after lying dormant for years.

Monarch Gold mine near Sierra City, for several years a noted gold producer, has been acquired by the Monarch Alconda Mining Company. The new owners say that the old producer will be reconditioned, new equipment installed and efforts made to keep mine on a steady production basis.

It is reliably reported that one of the biggest spot houses here is to be closed, probably in the next few weeks, and is shopping the market for supplies. The supply of whiter grades is becoming more scarce, and buyers are turning more eagerly to the lower grades, only to find them in rather strong hands and a growing inclination to hold for advanced prices.

HOLDING URGED

Factors are urging their clients to hold tenaciously to their cotton until March and May covering before the market is becoming a much stronger demand and willingness to pay greater premiums.

F.B.I. cotton men continue to report good business, with more activity than recently in the longer staples that have been more or less dormant this season.

One firm sold 100 bales of 56-58 cotton, and another 100 bales of 55-57 cotton.

There is little speculative interest in Memphis with the passing of January.

SALES LIGHT

Total sales this week here were 18,200 bales, including only 700 bales of spot cotton actually reported by buyers and factors. Total receipts at Memphis for the week were 55,000 bales, 15,000 of which were locally produced, which compares with 31,900 and 8900 this time last year and 55,000 and 15,000 the year before.

Total shipments ran ahead of the receipts by some 6000 bales and total stocks on hand were reduced by this amount to 268,000 bales, which is 38,000 bales less than were in stock here this time last season.

Weather conditions have been ideal for preparing the soil for the coming crop. Abnormally wet and warm weather, with temperatures as high as 65 deg., has been followed by cold weather with temperatures ranging from 2 to 15 deg. minimum, these conditions alternating three or four times already this winter. If we survival means anything, it will be a rather bullish condition, as we weather, followed by freezing, was formerly supposed to greatly deplete the ranks of the hibernating insects.

CROP OUTLOOK

With regard to the size of the coming crop, if winter influences count, it may be said that economic condition of the farmers is fair to good, and so far there has been nothing said as to concerted effort to reduce the acreage. All things considered, it is usually believed that the southern farmer will plant every foot of ground in cotton. Good credit and a fair supply of good seed, will aid in keeping the acreage large.

However, the chief worry will be labor. Planters everywhere in the central hills are experiencing labor in order to keep them from deserting to join the gangs being formed by government engineers in the big river-control project. Upward of 10,000 persons, largely negro farm hands, will be utilized in this project and until the planting season is well under way, little, if any, labor will be available.

Stock Exchange
is Authorized

SAN FRANCISCO, Jan. 27. (Exclusive)—The Transamerica Corporation has been authorized by the State Corporation Department to issue 1,500,000 shares of its stock to stockholders in the Bank of America N. A. in exchange for shares in that bank issued and outstanding. The ratio of exchange will be one and one-half shares of Transamerica for each share of Bank of America N. A.

Transamerica Corporation is also authorized to sell the unissued portion at \$125 per share.

OPTIMISTIC ON OIL

Analysis of Situation Made by Brokerage Concern

Although new oil fields will be constantly developed in the United States, there is at present a sufficient curtailment of development and prospecting that present even increasing consumption will overtake the rapidly declining production in the near future, according to a report of the oil industry entitled "Black Gold," just published by Toole-Tietzen & Co., members of the Los Angeles Stock and Curb exchanges. With this condition it is inevitable that the industry as a whole will improve, the experts stated.

"With new fields in sight," the booklet states, "we can easily picture a prosperous period ahead for California oil. Regardless of how much new oil might be discovered in the Midcontinent or foreign fields, the production of oil imports to meet Pacific Coast needs the transportation cost on oil is such that California prices can be increased considerably before a balance would be reached."

OLDSMOBILE OUTPUT
SHOWS BIG INCREASE

NEW YORK, Jan. 27. (Exclusive)—Production of the 1929 Oldsmobile is being increased rapidly and equipment at the Oldsmobile factory is now practically at the peak reached during the spring and early summer months of last year when new high production records were made, officials announced today. The production schedule for this month will be several times greater than that of January, 1928.

Annual sales made at the New York Automobile Show were reported to be large and most satisfactory.

Local exporters and importers today on the President's Jackson include N. P. Milnor, of the national system of steamship lines, Milnor, Inc., bound for Shanghai; William J. Gorham, Los Angeles importer, from Manila, the Philippines; widely known brewer of Pasadena, also to embark will be H. J. Fisher, medical missionary, to Manila.

Arrived yesterday from the Presidio of San Francisco, the first ship to bring the first-class passengers, among them John Duncanson, San Diego sportsman, returning with Duncanson, after an extensive tour of the Far East, and Charles E. Warner, American construction engineer, who has been engaged in the construction of Tokio, and Manila. The liner's 2200 tons of freight unloaded here, included from Singapore, rice from Shanghai, and 600 tons of coconuts from Manila.

NEWS OF FERTILIZER
ANNOUNCED

One of the Ocean Products Corporation, producing fertilizer at its coastal Island plant from fish-oil products, to the United States Company of Los Angeles, was announced yesterday at a press conference.

The new enterprise will be headed according to reports, by G. H. Lewis of Pomona and L. C. Barnes, head of the Pacific Nut Oil Company, of this city. It is planned that the two companies will be in a single concern, under a plan of plant expansion, utilizing the factory harbor and the up-plant of the United By-Products Company.

Capt. Harry Krog relinquished command of the Swaine & Hoyt Point Gorda yesterday and is immediately for Mobile. He will be succeeded by Capt. of the steamer Minook and H. H. Watson, recently purchased from B. W. Moore for Gulf Transport. Capt. J. T. Larsen, who succeeded Capt. Krog, has been appointed to command the steamer and will take her out to Oregon and way ports today.

Capt. Krog announced that the steamer, to be renamed the Point Gorda, will arrive here about 1st, next, under his command and that the Houston, to be called the Point Pedro, is due on her return visit to the Pacific. Approximate date will be expected to be about 1000-toners in refitting that from California to the Capt. Krog is being accompanied by Henry Gelman, superintendent for H. H. Hoyt.

The Point San Pablo, San Pedro gives the Pacific coast a total of eleven ports and will increase the frequency of sailings from ten days.

Capt. Larsen's motorship passenger service from California to the east coast of South America will be routed via the Panama Canal beginning in August. It is via the Straits of Magellan and via Capt. Harry H. Kirkham, manager of the General Steamship Corporation, Coast for Westfall-Larsen.

Kirkham explained that in his itinerary, enabling the return to Los Angeles from California in twenty-two days, when made the result of a trip from the American Chamber of Commerce of Brazil.

The market saving in time of sailings will result in large financial gains to coffee importers. Capt. Kirkham, "while it also aid the development of a trade with Brazil in fresh fruits and vegetables. One must sail in all respects, with a speed of 10 knots, accommodations for first-class passengers and a maximum of 60,000 cubic feet of cargo space."

A thousand signs of business from the Canal Zone were seen yesterday aboard the modern liner London Imperial, from Glasgow and Liverpool with several cabin passengers and 2300 tons of cargo from the Kingdom.

One hundred cabin passengers from California freight went to New York and New Jersey, and were aboard the Pan-American liner California, owned by James E. Roberts. Among them were Los Angeles co-eds, who "Miss California" at the National Carnival and Mardi Gras, to be held in Havana Feb. 17.

New Trial Will be Demanded in Extortion Case

Joseph E. Stone, convicted by a jury of attempting to extort \$300 from C. F. Kinnane, 62 South Westmoreland avenue, by "flashing" a fake police badge and threatening him with arrest, will appear before Justice Michael J. Slepian today on hearing of a motion for a new trial. The motion was filed by his attorney, Charles Craddick, following the conclusion of his trial several days ago.

Witnesses introduced by

City Prosecutor Horowitz testified that Kinnane had gone to a downtown bank to get the \$300 demanded, but that when the teller suggested a cashier's check instead of cash, Kinnane disappeared.

Music Lovers Meet at Beach

SANTA MONICA, Jan. 27.—Mrs. Abbie Norton Jamieson, president of the California Federation of Music Clubs, presided at yesterday's monthly conference of presidents of music clubs at the Miramar Hotel here. REPORTORY PLANS LAID AT MEETING

Theater Group Will Seek to Enlarge Its Membership by 5000 in Los Angeles

Plans for a city-wide campaign for an increased membership of 5000 were made yesterday afternoon by charter subscribers of the newly organized Los Angeles Repertory Theater, who met at the Figueroa Playhouse. Many subscribers pledged themselves to bring in five memberships for this venture, which is presenting, exclusively on the Pacific Coast, offerings of the New York Theater Guild, with which it is affiliated.

"One of the reasons why there is such a theatrical upsurge and failures in New York is that playgoers are rebelling against the vulgar, banal, tawdry productions and are demanding a Renaissance of the drama," Margaret Bourne, representing the Theater Guild, said.

Other speakers included Lillian Leighton, H. Ellis Reed and E. Behymer. Entertainment director by Alexander Konoff, pianist; Mme. Tumanova, soprano; Samuel Pedersen, tenor, and the Los Angeles Repertory. The Dudley Blanchard was appointed subscription director.

LANDLORDSHIP TO BE TOPIC

Clarence W. Horne, president of the Apartment-House Association of Los Angeles, will give a lecture on apartment-house management at a university college, downtown division of the University of Southern California, Wednesday evening at 8:30. The talk on the thirteenth floor of the Transportation Building Records, accounting, income tax, and special assessments will be covered by Mr. Horne's talk.

DON'T LET THAT COLD TURN INTO "FLU"

That cold may turn into "flu," grippe, or worse, pneumonia, unless you take care of it at once.

For instance, the congested nose, or hoarseness, will tell. An aspirin or the messy old mustard plaster, the last, camphor, menthol and other simple ingredients, is a counter-irritant which stimulates circulation and helps break up the cold.

You will feel a warm tingle as it enters the pores, then a cooling sensation that brings welcome relief.

At the first sign of a cold, take the head take Musteroles Cold Tablets. They usually give prompt relief.

Jars & Tubes

MUSTEROLE
WILL NOT BLISTER

OCCULT LEADER TO RETURN HERE

Krishnamurti Preparing to Reopen Ojai Camp

Head of Order of Star Will Leave India Soon

New Book Throw Light on Teacher's Doctrines

Jiddu Krishnamurti, head of the Order of the Star, is preparing to leave India for Los Angeles, to arrive here about March 10. It was announced yesterday in a cablegram received by Dr. John Ingleson of 2123 Beachwood Drive, national organizer of the order.

Krishnamurti leaves India on February 2. He will remain in Southern California for four months, first as the guest of Dr. Ingleson while in Hollywood and later as speaker and adviser at the Ojai camp of the organization. There he will conduct a series of public talks each Saturday night and Sunday morning until the annual congress of the order commences May 27. Krishnamurti has many friends here who are preparing to greet him as on previous annual visits.

NEW BOOK OUT

Coincident with this announcement, local members of the Order of the Star received advance copies of Krishnamurti's latest book, "Life in Freedom," just published by Horace Liveright. Much of the material was compiled from the author's addresses at the Ojai camp of last year, and other made in Berlin and in Ommen, Holland. The theme of his discourses is "Happiness." Of the American and the Indian viewpoints, he writes:

"In America they are making the search predominant in the search for happiness. They say that without physical comfort, without a body that is strong and healthy, there cannot be a right development of the emotions. But in trying to establish perfect physical conditions they are losing sight of other essentials.

"In India they go to the opposite extreme and in search of happiness they neglect altogether the physical."

NO THEOSOPHIST

Because Krishnamurti is a protege of Annie Besant, head of the Theosophical Society, he has been regarded as a Theosophist. Mrs. Besant's acclimating him as a world teacher added to this belief among the public. In his chapter, "The Search," he writes:

"When I went to Europe for the first time, I lived among people who were Theosophists. I was in with also against Theosophists with all their jargon, their theories, their meetings and their explanations of life. When I went to a meeting the lecturer repeated the same ideas. But I did not satisfy myself or make myself happy."

"In my readings, I saw less and less of the people who merely repeated the ideas of Theosophy. I questioned everything because I wanted to find out for myself."

Another preconception which Krishnamurti seems to brush aside is the one that he is a leader. He writes:

DISCLAIMS LEADERSHIP

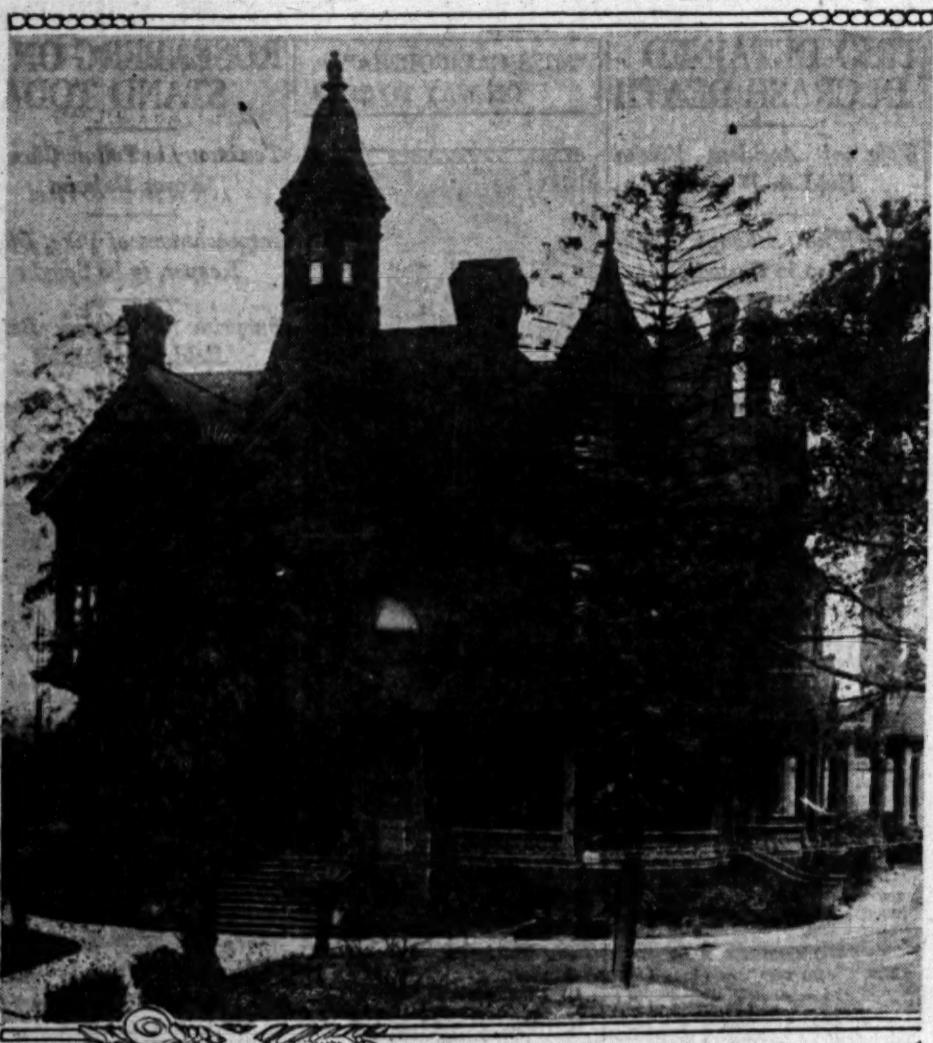

"I never want to be a leader. I never want to have authority. I want you to become your own leaders."

"Stand in Your Own Strength" is another inspirational topic which bears out Krishnamurti's advice to his audiences to grapple with their own lives and problems. He speaks of those who because they are not strong without the support of another have been given crutches that will support them momentarily, instead of developing their own strength to go forward in search of the pure waters of truth."

The book is short, handsomely typed and gives a comprehensive synopsium of Krishnamurti's latest views.

GHOSTS WAIL DIRGE IN DOOMED PALACE

Bradbury House's Secrets of Past to Die in Debris

The Old Bradbury House

Sir, he made a chimney in my father's house, and the bricks are alive at this day to testify it.

HERE are five chimneys and

five turrets topping Bradbury House on Court and Hill streets. Until recently the bricks of these chimneys and its exotic spirals testified that Bradbury House was much alive, indeed.

The chimneys have scarcely grown cold. Standing on the spacious roof of the old mansion, you still fancy smelling wisps of smoke from mesquite logs. In the curved windows of the towers you still imagine blinding light.

Each house has its day and Bradbury House had many of them—nights rather, of brilliant festivities, when, in the eighties and nineties Los Angeles' elite was dined and wined at this baronial mansion.

Last night, the light of the moon was the only gleam that reflected from the thirty-odd curtainless windows of as many rooms in Bradbury House. In vain did the ear try to catch a single sound. The hum of festive clatter long since moved to other quarters of the city.

IT'S DOONED NOW

Next Friday, Bradbury House will crumble under the maw of a steam shovel and the roar of the power of the hill where the one-time \$125,000 mansion towered over The Times Building, down east. And all that will remain of Bradbury House is its low wall of cemented granite blocks, with an ornamental iron fence.

Perhaps the wreckers will not

arise in its stead, several acres of land on the crown of the hill where the one-time \$125,000 mansion towered over The Times Building, down east. And all that will remain of Bradbury House is its low wall of cemented granite blocks, with an ornamental iron fence.

Perhaps the wreckers will not

arise in its stead, several acres of land on the crown of the hill where the one-time \$125,000 mansion towered over The Times Building, down east. And all that will remain of Bradbury House is its low wall of cemented granite blocks, with an ornamental iron fence.

MEMBER OF THE ASSOCIATED PRESS
The Associated Press is exclusively entitled to the use for reproduction of all news credited to us and we do not credit any other paper and also all local news published here within.

The Times aims at all times to be accurate in every published statement of fact. Readers who discover any important inaccuracy of statement will confer a favor by calling attention of the Editorial Department to the error.

No employee of The Times is permitted to accept any gratuity, in money or its equivalent, from any individual, group or organization having news or business relations with The Times. The public should clearly understand that it is unconscionable and wrong to get news into The Times and that any Times employee who accepts "gifts" calculated to influence his or her work for this newspaper is thereby rendered subject to immediate discharge.

Bad laws, if they exist, should be repealed as soon as possible; still, while they continue in force, for the sake of example they should be religiously observed.

—Abraham Lincoln.

Today's Bible Text.

Make a joyful noise unto the Lord, all ye lands. Serve the Lord with gladness: come before His presence with singing. Psalm c. 1, 2.

TAKE TO THE WOODS

The House Committee on Ways and Means has been considering the tariff schedules on woods. In the woods is a very appropriate setting for tariff talk.

BEFORE TAKING

An Idaho Senator is urging a tax of half a cent on bottle caps. Does he expect to trawl the home-brewers with this sort of legislation?

POLITICAL NOTE

The youngest member of the Oklahoma Senate is but twenty-six years of age. Five years ago he was working as a mechanic in a garage for \$2 a day. We will leave it to Will Rogers to decide whether this is progress or not. Sometimes a good mechanic has been spoiled to make a poor politician.

THE HEATED TERM

With the mercury at better than 100 degrees in the shade at Buenos Aires visitors to Argentina agree that a January in that country gets up a lot more human steam than California or Florida can furnish. There doesn't seem to be hot enough to go round.

THE SHRINKING HILLS

Are our mountains dwindling away? The geodetic surveyors reveal that our splendid Mt. Whitney has shrunk nearly five feet since it last had its measurements taken, some twenty-three years ago. The mountain is now only 14,495 feet high. Of course this is quite sizable—even in a galaxy of mountains, but we hate to think of anything fading away in this magic climate. We talk about building up bodies and here our own loved hills are reducing on us. At this rate in another trillion years Mt. Whitney may be nothing but a pimple.

OUT OF THE SKIES

Never can tell what will happen. An auto and an airplane had a head-on collision on a lonesome trail in San Bernardino county. They had the whole world to move in, but had to crash together in this neglected spot. The pilot of the plane was suddenly compelled to make a forced landing and he came down to the road just as the car came sharply around a curve. Both drivers sought to evade the impact but it was too late. However, both had been able to reduce speed and the full shock of the tragedy was averted. Six persons were in the mix-up but none was killed. That was the lucky part of a freak accident. Men and women who go blithely forth know not where or how they will bring up. The world is full of surprises and some of them are tragic.

PLANETARIUM

A Hollywood is to have it. Where else could it function to better advantage? With the number of stars in the studio as well as in the sky, the movie colony is the logical place for a planetarium.

Squashes, turnips and potatoes may be bought in the basement and heavenly bodies scanned in the dome. The public may regale itself with radishes and pumpkins for the body and planets for the mind without leaving the building. The whole man will be served under one roof.

With 4500 stars and 500 cars parked in the same structure, it ought not to be so difficult to hitch wagons to stars as in the days of Emerson. Whether movie celebrities will accommodate themselves to the stimulation of business, has not been announced. However, Hollywood seldom fails to rise to the occasion. So we may soon be able to secure our Wampus products and cabbage simulacra.

At least in Hollywood you do not have to look at the same twinklers year in and year out, like Venus and Jupiter. Old ones have a way of fading out of the picture and new ones radiate. Cameramen, poking their lenses into the face of the public in out of the way places, find new luminaries running elevators as well as in banal halls.

The thing appeals to both the imagination and appetite. Here is intrigue for both brawn and brain. The movies are noted for doing the drudgeries with artistry. Some of them lend themselves to a charity bazaar or a new brand of cigarette with equal elasticity.

A FOREST POLICY
For years men of consequence and affairs have devoted their time and talents and donated large sums of money to waken the American people to the crying necessity of preserving the forests, woodlands and water-sheds with which nature originally so richly endowed this country and which our people have exploited mercilessly and in many instances have allowed to suffer from criminal waste and destruction.

The good work has borne fruit. Although as a nation we are far behind such Old-World countries as Germany, Switzerland and Scandinavia in providing protection for our forests and timber, our people are being roused to the value of this first of our natural resources and are pressing for forest policies that shall end the menace of leaving to our children a treeless and desolate terrain.

California, being blessed with the grandest timber growth in the whole world in its forests of redwoods, Douglas fir, incense cedar, and being, moreover, dependent for its economic life on the preservation of its watersheds, has a peculiar interest in formulating and enforcing a definite forest policy. Such a forest policy has been devised and put forward by the California Development Association. That body's forest committee's platform, practically applied to this vital problem, promises to go a long way in correcting past abuses and insuring the preservation of this our precious heritage.

The first and obvious conclusion is that all forest lands in California be put under definite forest management, these lands being defined as areas primarily adapted to the growth of timber, roughage, shade trees, chaparral and scrub brush. These must be preserved for their several major services; conservation of water for domestic and irrigation uses and power development through the reduction of erosion by floods and destruction by fire; the perpetuation of the State's wild life, both fauna and flora; the production of lumber and other forest material; the grazing where feasible of live stock; the reserving of certain areas of especial beauty or historic interest as a recreation ground for the people.

The main object of this program is to encourage the permanency of satisfactory conditions in all forest land both public and privately owned. In this the State must assist by providing forest-fire protection; by giving the private owner full power to control trespass; by a system of taxation that shall encourage reforestation; by taking over, when the public interest so demands, all areas not satisfactorily conducted as industrial forests and all cut-over lands which the private owners prefer to relinquish, these latter to be managed by Federal, State or local government with equitable compensation to the owners.

The California Development Association's program reaffirms the continuation of Federal ownership of the present national parks in California. It favors the policy of extending Federal ownership to all forest areas on which there is no proper forest management. It believes that forest lands should be acquired by the State of California outside the national parks through the following means: by the retention of forest lands which have been sold to the State for nonpayment of taxes; by exchange; by purchase. All lands so acquired should be placed under the direction of the State Board of Forestry.

It favors forests managed by counties, cities or other organized communities for watershed protection, for recreational use or for timber production. It leaves to the State Board of Forestry the power to determine whether or not satisfactory conditions are being maintained in such forests and to prescribe measures to be taken to remedy any defects. It also authorizes the State Board to determine what areas should be classified as timberland, what as woodland and what as chaparral.

The whole program is a comprehensive attempt to deal practically with a problem that everyone recognizes as vital to the State. The American people are alive today to the urgent and immediate demand for tree protection. Many States are working out plans to save their timber resources and to obviate further waste. California, with its wealth of irreplaceable redwoods and its utter reliance on the preservation of its watersheds, should be among the first of the States to put into force an adequate forest policy.

FRONT VIEW OF AMERICA

Marcel Paul, noted French industrialist, writing from his home in Nancy, France, to the New York Times, tells how he was impressed by the activity of industrial America during his recent visit to this country.

"My impressions," writes M. Paul, "are covered by one word—formidable." He said he had read many descriptions of our activity and might development, but that even the most enthusiastic of them were not up to the reality. Nowhere else has he found "an ardor for work" comparable with that which prevails in American industrial centers.

"Everywhere," he says, "intense labor prevails, with the good humor and the joy of work. Add to this the spirit of enterprise, of confidence in the future, how can we doubt that, under these conditions the United States is facing the dawn of an era of prosperity still more prodigious than the one we are now contemplating. I see only a single shadow on this picture—the development of the population. I am told that American women no longer wish to have children. How can this be possible? How can a healthy, young and vigorous people refuse to fulfill the first of its duties?"

Americans will appreciate this tribute to their activity and industrial greatness, but some of them—the feminine portion in particular—may be inclined to resent the strictures upon their willingness to increase the population. They probably will point out that such criticism comes with poor grace from a Frenchman, as France has shown an alarming decrease in its birth rate in recent years.

At least in Hollywood you do not have to look at the same twinklers year in and year out, like Venus and Jupiter. Old ones have a way of fading out of the picture and new ones radiate. Cameramen, poking their lenses into the face of the public in out of the way places, find new luminaries running elevators as well as in banal halls.

The thing appeals to both the imagination and appetite. Here is intrigue for both brawn and brain. The movies are noted for doing the drudgeries with artistry. Some of them lend themselves to a charity bazaar or a new brand of cigarette with equal elasticity.

The LEE SIDE O' LA

BY Lee Shippey

WE DIDN'T find out who they were. They were in a car from the Middle West, and we suppose they were tourists. But as they were driving through Eagle Rock they suddenly stopped, and the car behind stopped, and the car behind that one, and in a minute there was blockade about two blocks long, and about half the blocked ones were honking furiously, making their horns swear if ever horns did, and all the rest were asking what the dickens was the matter.

"It's a Got a Little List"

Friend Leeway: The chap who wrote "The Mikado" was all right in his way, but I'll bet I could get more popular votes in this country for my little list for the Lord High Executioner. I'd start it off like this:

The man who invented jazz.

The man who invented hard shirts and tuxedos.

The man who invented the custom of cutting lettuce with the fork, instead of with the knife.

The others I would have merely hanged, but the last mentioned I would have boiled in salad oil—Mac.

News to Us
First we'd heard of anybody inventing a way of cutting lettuce with the fork. We've never been able to do it, and quit trying long ago. It may be all right for people who don't care for lettuce, but we like to eat ours.

Hurrying to Nowhere

We started this column with a brevet for considerate motorists. We're going to end it with a sneer of withering contempt. The greatest of all modern conveniences, the motor car, certainly has bred in lots of us habitual selfishness and lack of consideration. If that were not so there would be very few accidents.

On Western avenue, at a busy intersection—but one at which no traffic bells were working—we saw a timid old man stand on the corner—or in the street a foot from the curb—for several minutes, while car after car whistled past him. Anyone could see he was trying to get out to the safety zone, but was afraid of that endless stream of traffic. But though fully half of those motorists couldn't have been in any great rush, each one seized his opportunity to whiz past the old man—and let the next fellow stop. And each next fellow didn't stop. So the old man missed his street car—it pulled out as he vainly gesticulated and supplicated.

But anyhow, he was the guardian angel of the fiddlers of the Colorado River. He was going to have a dam and an all-American canal if he had to. He had enough to keep the politicians lobbing in action—guys like Mark Rose. Maybe you never heard of him, but he has heard of you. Anyhow, whenever Congress was about to meet or there was a new show in town Mark would collect another assessment for expenses and hop the next Pullman for Washington. Say! for a while he had the diners almost cleaned up on toothpicks.

CHRISTIAN CITIZENS URGED TO GIVE FITTS SUPPORT

Snape Praises District Attorney in Effort to Administer Office According to His Oath

Another reason why marriage doesn't last is because people care about each other.

And then, again, the old-timers may have been better because they were better.

Another good way to mow the world is to marry a woman.

Still, if we were consistent, we'd be sucking thumbs at 70.

There is nothing different about the "emancipated" woman except that she seems to be interrupting her husband's vorite story.

"The poor are in closer touch with Nature." Of course, he could always pick a rainy day to move.

"Four felonies make a habitual criminal" may be a good definition if the definition felonies is all right.

There is not exact equality in matrimony. One will love the more and the other will get the less.

Americanism: Feeling toward you because you surrender to him at intervals; hating other fellow because he surrenders to the same.

SCHOOL BELL SPEAKS

CHURCH DEDICATION

AID TO RELIGION

"At present the school is the most powerful agent in community religion," declared Rev. William C. Usery, Oberlin. The church stands in its standard, the standard that is the early centuries united all Christians in the enterprise of spreading the knowledge of God," said Mr. Isett.

"It is not by either assumption or real authority that any church will take its proper place as a religious force in community, but by a united program of character-training according to the pattern of Jesus Christ, together with a determination to make all society throughout the world conform to that character of love and harmony, of justice and of religion and its expression in all lines of community activities, with the soul as its special field of cultivation."

LESSON SERMON HAS

TRUTH FOR SUBJECT

Christ Jesus said shortly before the sermon, "A new sign shall follow them that believe. In My name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing it shall not hurt them; they shall lay hands on the sick, and they shall be healed." These words of the Gospel were among the scriptural citations read in the lesson-sermon on "Truth" yesterday at all Churches of Christ, Scientist, branches of the Mother Church. The lesson-sermon also contained selections from "Science and Health with Key to the Scriptures" by Dr. Mary Baker Eddy, including the following passage: "To understand all our Master's sayings as recorded in the New Testament, sayings infinitely important, his followers must grow in the true stature of manhood in Christ Jesus which enables them to interpret his spiritual meaning. Then they know how truth casts out error and heals the sick."

EVERYTHING PRODUCED

VIBRATORY MOTION

Dr. E. E. Thomas, P.R.C., ad-

ATTORNEY RIVES SUCCUMBS

Edward L. Rives, an attorney, died yesterday morning at his home in Downey. He was 58 years of age.

He leaves his wife, Elizabeth S. Rives; a sister, Mrs. Pauline Rives; and two brothers, Robert and Howard Rives. The body will be at the J. A. Coleman mortuary, 4440 Whittier Boulevard, until funeral services tomorrow at the Whittier Heights Cemetery chapel at 3 p.m.

operation ten days ago. He was born in Downey September 4, 1890, and made his home there.

Mr. Rives was a son of the late Judge James C. Rives and had practiced law in this city since he graduated from the University of Southern California law school in 1914. His health commenced to fail two years ago and his death was due to complications following an

dressed Rosicrucian students at Music Hall yesterday on "The Law of Growth." He said in part: "Everything in the material world is produced as a result of vibratory motion. As long as there is motion, which is vibration, we cannot get away from God, for it is in God that we exist, and by reason of this, God must be manifested in the mind and soul according to the law of vibration, which is the law of growth, so even the planet upon which we dwell is constantly progressing in its evolution. From the electrons of the atom to the molecules, the cells to the highest form of manifested life, the law of motion, which is the law of vibration, reigns in building its own sepulcher."

PASTOR POINTS NEED

FOR GREATER FAITH

Dr. J. George Dorn, pastor of Hollywood Lutheran Church, preached yesterday on "Faith the Dynamite of Progress" and Judge Gary once said that there was something wrong with business conditions, adding that that something was lack of confidence, the abnormal, unnecessary and timid. Unnecessary attitude of mankind. Confidence is the main element which makes for progress and prosperity.

Now it is only logical to assume that what damages the commercial world damages also the spiritual world. Our great lack is faith. The church is here to help us in our efforts to join them in the great enterprise of instilling and developing this element which makes for happiness and contentment."

Of Interest to Women.

SOCIETY

BY JUANA NEAL LEVY
The New Year has witnessed an exceptional exchange of visits between Europe and the United States. Many Americans residing abroad have seized the short period intervening between the close of the London and Paris winter social season, and the grand finale of the Egyptian and Riviera season, to hurry back home for family visits and those inevitable trips to Europe for several days in London and Paris before going south.

Mr. and Mrs. William M. Fleitmann are in Paris for the moment with their son and daughter-in-law, Mr. and Mrs. Frederick H. Fleitmann, who recently married and are about to go to Canada, and will leave this week for Egypt.

Mr. and Mrs. Loomis Johnson of Paris are in New York for a visit with friends and relatives. Mr. Johnson is a son of the former Governor of Minnesota.

Mr. and Mrs. Lewis G. Stevenson of Illinois are visiting friends in Paris before leaving for Constantinople, where they will pass a few weeks with their son-in-law and daughter, Mr. and Mrs. L. Ives of the American Embassy. Mr. Stevenson is the companion listed in Who's Who as a farmer. He owns several thousand acres of land in Illinois, Indiana and Iowa.

Mr. and Mrs. Charles R. Scott of New York are visiting in Paris prior to leaving for the Riviera, where they have taken an apartment at the Carlton Palace Hotel for the rest of the season.

Mrs. S. A. Jarret of St. Louis with her sister, Mrs. A. L. Bartlett, and her mother, Mrs. A. C. Curry, are in Paris en route to India.

Mrs. A. Tyler-Habeson, who used to make a winter trip to America in the autumn, has this year postponed her departure until now.

Mr. and Mrs. Frederick Prince of Boston, who enjoyed the holidays at their home in Pau, France, are in Paris en route to America. The

NEWS OF SOUTHERN COUNTIES.

SUNDAY-SCHOOL TEACHER JAILED

Redondo Beach Man Held on Serious Charge

Little Girl Tells Father of Asserted Attack

Other Improper Advances Rumored in Court

REDONDO BEACH. Jan. 27.—Charles C. Laven, 45 years of age, assistant superintendent of the Christian Church Sunday-school here, was arrested yesterday on charges of attacking 11-year-old Harriette Bailey, daughter of Al O. Bailey, engineer for a local oil company and a prominent Mason.

It was brought out in testimony before Judge Moodie, who held Laven in \$3000 bail, that the assistant Sunday-school superintendent, who is the asserted aggressor of small children, is asserted to have made improper advances to three other small girls recently. The parents of these children were in court, but their names were not learned.

Mr. Laven has been a resident of Redondo Beach for about seven years. It could not be learned today where he lived before that. In addition to his duties as Sunday-school superintendent he also is janitor of a local public school. One of his sons was married recently.

Preliminaries in Progress on San Gabriel Dam

AZUSA. Jan. 27.—A crew of sixty men are now employed by the contractors of the San Gabriel Dam in laying foundations for warehouses, machine shops and cabins for the workmen.

Materials and light machinery for the machine shops are now being brought to the site, according to a representative of the contracting firm of Ross, Fisher, McDonald & Kahn.

Work also has begun on clearing the rail track in preparation for the hauling of heavier materials and supplies. It is expected that traffic commences, general traffic will be confined to those living in the canyon. It is announced.

Graduates Hold Vesper Services

VAN NUYS. Jan. 27. Vesper services were held this afternoon at the high school auditorium by the mid-winter graduating class of the Van Nuys High School, as a preliminary to the graduating exercises that are to be conducted Tuesday night. Thirty-nine boys and girls will receive diplomas. Miss Ethel Taylor will be given the Ephebian ring.

HEAVY CROP OF SMALL VALENCIAS IN SIGHT

ANAHEIM. Jan. 27.—The 1929 Valencia crop will be phenomenally heavy, but sizes will run small, according to estimates issued by D. D. Waynick, in charge of the association laboratories here. The estimates are based upon measurements of fruit in seventeen representative groups of Valencia trees of from 10 to 20 years old. The tree at present is 2.31 inches; inside it measures 2.61 inches, the smallest calibration shown in five years, Waynick asserts. Picking sizes for the coming crop will be 232's and 242's, the laboratory manager predicted.

NEW SECTION PLANNED FOR COVINA HOSPITAL

COVINA. Jan. 27. A new unit to provide twenty additional beds for the Covina Hospital is to be built and completed within several weeks, according to Miss Melville Witter and Miss Levina Graham, owners of the hospital. The addition will be made on the east of the present building, and will provide fifty beds in all as capacity of the hospital.

BANDITS ATTACK TRUCKMAN

Typical Old-time Hold-up Perpetrated in Arroyo Seco by Two Men Wearing Masks

PASADENA. Jan. 27.—When Joseph Flora, driver for Bullock's, Los Angeles, was waylaid by two black-masked highwaymen as he was driving his delivery truck across the lonely Arroyo Seco last night, he had a taste of what was a daily occurrence in the stage-coach era.

The gunmen forced his truck off the road on Zanja street, near the Rose Bowl, and after threatening him with death, relieved him of \$40 and escaped.

"If the bandits had been on horseback instead of in an old Ford roadster, the wild west scene would have been complete," remarked the victim to Detective Sergeant Mansell and Cheek who were assigned to the case.

Flora told the police officers that the men who had waylaid him for several miles and that they must have timed his progress on his delivery route in order to waylay him in the unrefined canyon bottom.

The robbers are described as less than 30 years of age. One wore a light-gray cap and brandished a nickel-plated revolver.

CAVE MAN OF LAGUNA IN ATTACK

Pasadenan Reported as Victim in Bold Attempt Perpetrated Near Caves

LAGUNA BEACH. Jan. 27.—City, county and State officers are cooperating today to locate a "cave man" who brutally attacked a woman last night. Crystal Cove between Laguna Beach and San Clemente Beach. Police would not divulge the name of the woman, who is said to be the wife of a Pasadena newspaper man.

The woman, told Abe Johnson, City of Police of Laguna Beach, that she was walking along the beach front just at dusk. Suddenly a man, nearly naked, rushed from a cave and attacked her. He tore her clothes and began dragging her one heel into his hiding place.

The woman's hysterical screams attracted the attention of her husband, who was living in a house not far away. When the "cave man" saw the husband approaching, he released the pretty young woman and disappeared into the night.

Police at Laguna Beach, Newport Beach, together with State motorcycle police, were summoned and endeavored to track the "cave man" but so many persons had gathered at the spot that his tracks were blurred by Langer at somewhat less than \$8000.

Ole Anderson, a hermit 23 years of age, was arrested when the police entered one of the caves but he did not identify himself. The description of the "cave man." After questioning at the Newport Beach police station he was released.

The woman said she did not recognize the man. She said he seemed possessed of extraordinary strength. He had a red mustache.

VAN NUYS TO HONOR DATE OF FOUNDING

VAN NUYS. Jan. 27.—Plans for a Washington Birthday banquet to include an all-day celebration of the eightieth anniversary of the founding of the town of Van Nuys on February 22, 1911, are being arranged by members of the local post, American Legion. Henry F. Boulander and M. M. Lawton are at the head of a plan that will call upon all Legion posts in San Fernando Valley to participate in the celebration.

It is the intent of the Legion to make the celebration one of the largest and best attended ever held here. A

parade with at least 1000 ex-service men is said to be one part of the arrangements of committees in charge.

ANACHEIM. Jan. 27.—The 1929 Valencia crop will be phenomenally heavy, but sizes will run small, according to estimates issued by D. D. Waynick, in charge of the association laboratories here. The estimates are based upon measurements of fruit in seventeen representative groups of Valencia trees of from 10 to 20 years old. The tree at present is 2.31 inches; inside it measures 2.61 inches, the smallest calibration shown in five years, Waynick asserts. The robbers are described as less than 30 years of age. One wore a light-gray cap and brandished a nickel-plated revolver.

HEALTH CENTER SOUGHT

Torrance in Race for County Institution With Plot of Three Acres Near City Hall as Inducement

TORRANCE. Jan. 27.—Supporting the contention that this city, as the hub of the harbor district, is the logical site of the proposed new county health center for this district, a special committee of 100 has been formed to make a definite bid for securing the center. A tract of three acres near the City Hall is among the proposed sites which have already been put before Supervisor McClellan and Dr. J. L. Pomeroy, county health officer.

The plan which is expected to come before the Board of Supervisors in June would include the erection of a \$75,000 or \$100,000 building by the county on ground which is to be furnished by the city in which the center is established.

At a meeting held here on the 22nd inst. Dr. Pomeroy was present, putting the plan before the assembly and receiving the support of Mayor John Denham, Councilman W. W. West, Jerry Maxwell, in addition to that of the Chamber of Commerce as a whole and representatives of civic and charitable organizations.

Support of the county health center was also pledged by Dr. Posner, who was also pledged by the southwest branch of the Los Angeles County Medical Association of which Dr. George P. Shadler is president.

Under the health center plan as carried out in other districts, medical treatment at the centers is not available to anyone who is financially able to pay for care by physicians or private institutions, but to provide for medical care, a woman carrying on a continuous campaign for the prevention of disease and the maintenance of health standards.

Several other cities in this district are making efforts to obtain the health center, if possible, it is understood.

"The plan which is expected to come before the Board of Supervisors in June would include the erection of a \$75,000 or \$100,000 building by the county on ground which is to be furnished by the city in which the center is established.

"The plan which is expected to come before the Board of Supervisors in June would include the erection of a \$75,000 or \$100,000 building by the county on ground which is to be furnished by the city in which the center is established.
